## GXT Two Shaft Shredder

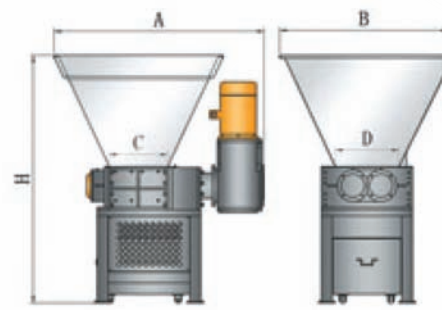

When continuously shredding large quantities and volumes or when pre-shredding is required for further procedures, Southeast Machinery GXT shredder with strong rotor-shearing cutting principle is the best choice. The material is sized by the hooks of the blades, pulled in and cut between the blades of the two opposed shafts. The two strong cutting rotors master all materials, even if difficult to shred or large and voluminous.

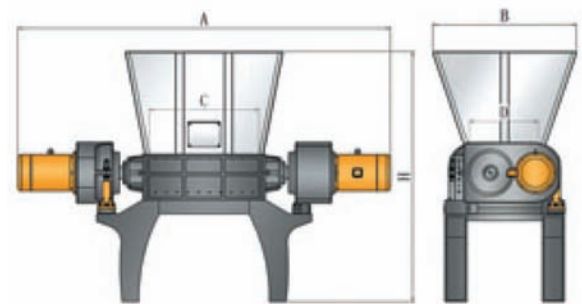

## TECHNICAL DATA GXT TWO SHAFT SHREDDERS

Model series	GXT21-40	GXT21-60	GXT21-80
A (in)	61.8	100.8	108.7
B (in)	49.6	41.7	41.7
C (in)	15.7	23.6	31.5
D (in)	18.5	18.9	18.9
H (in)	72.8	72.8	72.8
Blade Diameter (in)	11.1	11.1	11.1
Speed (rpm)	17	15	14
Blades (PCS)	20	30	40
Blade Thickness (in)	0.8	0.8	0.8
